

The Pandemic is a Portal

By Students & Co. Ltd

A collage of images related to a global pandemic. On the left is the Statue of Liberty. In the center is a globe with a virus particle on its surface, crossed by a yellow and black hazard stripe. On the right is a person in a full-body hazmat suit and mask. Below these is a city skyline with a prominent tower. A yellow banner with black text is superimposed across the center.

THE PANDEMIC IS A PORTAL

The video and the questions

This is called The Pandemic is a Portal by Suzanna Arundhati Roy - A Future where the Global Goals are achieved. If we go back to normality, nothing would change. Lockdown showed us what was wrong with our lives and the way we lived. For example racism is being more noticed but once we go back it could be overshadowed again. Doomsday machine means that people thought it was the end of the world or they only saw a negative outcome. A new world would be alot better than the world before lockdown.

BEFORE THE PANDEMIC

Thinking about before the pandemic it's difficult and unusual. We are use to it, it is like the pandemic became the new “ *normal* “ for us. With the pandemic we learned and adapted ourselves to deal with those situations.

But if we stop and think, before the pandemic we did have a lot of issues, for example :

- Pollution
 - Hygiene
 - How we managed & spend ourtime
 - Not being grateful
 - Competition & differences between countries and populations.
-

After The Pandemic

I think after the pandemic, some things will change. I think hand sanitizer would still be sold a lot, Some shops will permanently close and we could spend more time with family.

I also think that some people would change the way they live. Maybe some people will remain grateful

-Katie

AIR FORCE GUIDANCE ON USE OF CLOTH FACE COVERS

COVID-19

EFFECTIVE IMMEDIATELY

To the extent practical without significantly impacting mission, all individuals on Department of the Air Force property, installations and facilities are required to wear cloth face coverings when they cannot maintain six feet of physical distance in public areas or work centers.

Any cloth items worn as face coverings should be functional, clean and maintained in compliance with current Air Force instructions, and should cover the mouth and nose.

*N-95 and surgical masks should be reserved for health care workers.

Guidance applies to total force military personnel, DoD civilian employees and contractors, family members and all individuals on DAF property, installations and facilities.

Note: Guidance above does not apply within a personal residence on a military installation.

ⓘ CLOTH FACE COVERING DOES NOT PREVENT THE WEARER FROM GETTING SICK, BUT MAY PREVENT THE SPREAD OF THE VIRUS FROM THE WEARER TO OTHERS.

I think in the new world people will still follow loads of restrictions just to be on the safe side to protect.

I think possibly that they might lift a certain amount of people in somewhere like pubs or restaurants or barbers and hairdressers.

-Joshua

Long term Pandemic

I think social distancing might be a thing for a long time and if it's not a rule anymore I think loads will still follow it to be on the safe side just in case anything like this happens again. Masks should be wore by loads of people until it's 100% safe. I think there are gonna be shops shut forever like Debenhams but it wasn't making a lot of money either way and mothercare which is shut for good

Long Term Pandemic

I think pubs & restaurants will have a maximum amount of people allowed inside and definitely have hand sanitizer outside everywhere because it's very important to always wash your hands and I say the HSE {Health Service Executive} and Department Of Health will probably messages to advice people forever so you know what rules you should follow because it's very important so you know to take care of yourself and health because yours as well as anyone else's life matters.

New World

We believe that some places will still follow some guidelines. We think that schools will take longer to go back to normal. We believe that it will take more than a year for everyone in Ireland to get the vaccine.

We think that Covid-19 will always be a thing but won't be as bad for example the Black Death/ the Bubonic Plague still exists but its not as bad as it was.

We think with littering going on that's damaging the environment we think with this virus it could push the environment too far which could possibly cause a doomsday to happen if this goes on for many years and if no one is caring at all about recycling to help our planet it will just damage it even more.

If we go back to normality, nothing would change. Lockdown showed us what was wrong with our lives and the way we lived. For example racism is being more noticed but once we go back it could be overshadowed again. Doomster machine means that people thought it was the end of the world or they only saw a negative outcome. A new world would be ~~not~~ ~~for~~ ~~not~~ better than the world before lockdown.

* A Future where the Global Goals are achieved

New World

Will Social distancing be here forever.

Will masks be here forever.

Will we have much fun as we use to.

Will vaccines help alot

Will the world ever be the same again

Will ebola happen

As well as littering will this damage the environment

Will Schools + Jobs be normal

Was that the last lockdown

Will there always be a maximum amount of people in something

Will Covid stay forever

Are the government making the right choices

Will people stay grateful

Will people start being social again

• After Vaccines

Pandemic Shops reopening

Restrictions still in place

Masks will still be worn/sold

There will be a maximum amount people allowed in hotels/pubs, restaurants etc.

Some Shops will shut for good like Debenhams

You can travel as far as you want

If you go to another country you might not have to quarantine for 2 weeks

Every Shop might have Sanitizer still to be safe.

I think after the pandemic some things will change. I think hand sanitizer will still be sold more, some shops will permanently close and we could spend time with friends and family. I also think that some people would change the way they live. Maybe some people will remain grateful.

The message = That if we go back to normality we'll still be ruining the Earth e.g. Climate Change Dooomsday Machine I think means that ~~we are~~ before Covid we were building up to the end of human kind by what humans are doing/causing. For example we were putting too much CO² in the air which was catching the Sun's Rays in the atmosphere causing the temperature to rise.
